# Cold Cabinet / Refrigerator

## Introduction

A **Cold Cabinet / Laboratory Refrigerator** is essential for the safe storage of temperature-sensitive samples, reagents, chemicals, vaccines, and biological materials. Maintaining a stable and uniform low-temperature environment is critical to preserving sample integrity and ensuring accurate laboratory outcomes.

MB Lab Pro Services Cold Cabinets / Refrigerators are designed to provide consistent cooling performance, precise temperature control, and reliable operation. Built specifically for laboratory and pharmaceutical use, these units support regulated storage requirements while offering durability and energy efficiency.

# Product Overview

Our Cold Cabinets are engineered using advanced refrigeration systems and high-quality insulation to ensure stable internal temperatures with minimal fluctuations. The cabinets are suitable for continuous 24/7 operation and are ideal for laboratories where reliability and temperature accuracy are non-negotiable.

## Key Highlights

- **Precise Temperature Control**

Maintains stable low-temperature conditions for sensitive materials.

- **Uniform Cooling Distribution**

Ensures consistent temperature throughout the storage chamber.

- **Stainless Steel Inner Chamber**

Corrosion-resistant, hygienic, and easy to clean.

- **Digital Temperature Controller & Display**

Easy monitoring and accurate temperature setting.

- **High-Quality Insulation**

Reduces temperature loss and improves energy efficiency.

- **Safe & Reliable Operation**

Designed for continuous use in laboratory environments.

# Product Details

Parameter	Details
Usage	Laboratory / Pharmaceutical / Microbiology / Biotechnology / Research
Color	White / Grey (Powder Coated / Stainless Steel)
Power Supply	Electric
Voltage	230V AC, 50 Hz
Material	STD: SS 304 Inner & Powder-Coated MS Outer GMP: Full Stainless Steel 304
Warranty	1 Year

# Thank You

## Let's Build Reliable Testing Solutions Together

At MB Lab Pro Services, each **Cold Cabinet / Refrigerator** is manufactured under strict quality control procedures to ensure accuracy, reliability, and operational safety. Our solutions are designed to protect valuable samples and support critical laboratory processes.
