Stability Chambers

Introduction

In today's highly regulated pharmaceutical and biotechnology industries, maintaining product quality, safety, and efficacy throughout its shelf life is critical. Stability testing plays a vital role in determining how environmental factors such as temperature and humidity affect products over time.

MB Lab Pro Services Stability Chambers are engineered to provide precise, stable, and reproducible environmental conditions, ensuring reliable data generation for long-term, intermediate, and accelerated stability studies.

Our chambers are designed to support compliance with ICH, WHO, and GMP guidelines, making them a trusted solution for regulated laboratories worldwide.

Product Overview

MB Lab Pro Services offers a comprehensive range of **Stability Chambers** suitable for pharmaceutical, biotech, food, cosmetic, and research applications. Each chamber is built using high-quality components and advanced control systems to ensure uniform environmental conditions across the entire test space.

Key Highlights

- **Accurate Temperature & Humidity Control**

Advanced control systems ensure tight tolerances and uniform distribution.

- **Regulatory Compliance**

Designed to meet ICH Q1A, WHO, and GMP stability testing requirements.

- **Robust & Reliable Design**

Durable construction for continuous 24/7 operation.

- **User-Friendly Interface**

Intuitive touchscreen controller for easy operation, monitoring, and data logging.

- **Customizable Solutions**

Available in multiple capacities and configurations to match specific laboratory needs.

Product Details

Parameter	Details
Usage	Laboratory
Color	Sliver
Power Supply	Electric
Dimension	(L*W*H) 660 x 655 x 1250 Millimeter (mm)
Voltage	220-240 Volt (v)
Material	Stainless Steel
Warranty	1 Year
