Water Baths

Introduction

A **Water Bath** is an essential laboratory instrument used to maintain samples at a constant and controlled temperature over a defined period. It is widely utilized in pharmaceutical, biological, chemical, and research laboratories for applications where gentle and uniform heating is required.

MB Lab Pro Services Water Baths are designed to deliver accurate temperature stability, uniform heat distribution, and reliable performance, making them suitable for routine laboratory work as well as critical research applications.

Product Overview

Our **Water Baths** are engineered using advanced heating elements, precise digital controllers, and efficient insulation systems to ensure consistent temperature control. The water medium provides uniform heat transfer, protecting sensitive samples from localized overheating.

Key Highlights

- **Accurate Temperature Control**

Ensures stable and precise heating for sensitive samples.

- **Uniform Heat Distribution**

Water-based heating guarantees consistent temperature throughout the bath.

- **Digital Temperature Controller & Display**

Easy monitoring and precise temperature adjustments.

- **Stainless Steel Bath Chamber**

Corrosion-resistant, durable, and easy to clean.

- **Efficient Insulation**

Minimizes heat loss and improves energy efficiency.

- **Safe & Reliable Operation**

Designed for continuous laboratory use.

Product Details

Parameter	Details
Usage	Laboratory, Pharmaceutical, Microbiology, R&D, QC Labs, Educational Institutions
Color	Stainless Steel / Powder Coated Finish
Power Supply	Electric
Dimension	As per selected model (refer Technical Data)
Voltage	230 V AC, 50 Hz
Material	STD: SS 304 inner & powder-coated outer GMP: Full Stainless Steel 304
Warranty	1 Year
